

Josiah Parappally

josiahparappally@gmail.com | (647)-824-9936 | Mississauga, Ontario | josiahparappally.com

SKILLS

PROGRAMMING LANGUAGES	Python, Javascript, Swift
TOOLS	JSX, Docker / Docker Compose, Git, SQL, Jenkins, Numpy, Bootstrap
TECHNOLOGIES	Node.js, jQuery, React.js, Vue.js, Kubernetes, HTML, CSS

EXPERIENCE

THE WEATHER NETWORK | QA DEVELOPER, WEB

Oakville, ON | May 2019 – Present

- Created an interactive component library and custom component documentation using React.js and Styleguidist
- Designed the inaugural 36 hour weather page using React.js and Redux
- Developed a lazy load method for map tiles on <https://theweathernetwork.com/ca/map/radar> using Vue.js and the Google Maps API, reducing API calls and page load time by 70%
- Using TDD principles, completed UI, unit, integration, and component testing using Puppeteer, Selenium, Mocha, and Jest on 13 microservices, addressing and solving over 50 bugs/errors

WEBVELOPER | CUSTOMER ENGINEER

Palo Alto (remote), CA | July 2019 – Present

- Created site mockups and designed web-applications for customers using HTML, CSS, Javascript, React.js, and jQuery
- Communicated with customers daily to ensure that all changes to sites were made within 24 hours of a request

UWATERLOO FINTECH CLUB | VICE PRESIDENT OF SPONSORSHIP

Waterloo, ON | Sept 2018 – Jan 2019

- Presented a lesson on blockchain, cryptocurrency, and RSA encryption to over 50 students
- Secured funding from Subway and a local pizzeria to have food provided at all general meetings

PROJECTS

GUIDIN'-GEORGE | PYTHON, TWILIO API, DJANGO

<https://github.com/parappally/Guidin-George>

Text-messaging application that sends directions based on the user's current location and specified destination without the user needing internet or mobile data

COMMUZE | SWIFT, CORELOCATION, MAPKIT

<https://github.com/parappally/commuze>

Given a destination and waking radius, app tracks user and alerts them when they enter a geofence of the specified radius around the destination. Won the PCHacks 2019 Hackers Choice Award

HEMOCOURTADVANTAGE | PYTHON, NUMPY

<https://github.com/parappally/homeCourtAdvantage>

Using 2018-2019 NBA data, determined which NBA teams experienced the largest/smallest home court advantage by comparing the location of games and a team's resulting field goal percentage

SUPREMEBOT | PYTHON, SELENIUM

<https://github.com/parappally/supremeBot>

Created a bot capable of adding any item on the Supreme website to the cart, and autofilling the user's information

FACEMATCH | SWIFT, COREML

<https://github.com/parappally/facematch>

Connects to a phone's selfie-cam and uses facial recognition to measure facial proportions and compare them to the golden ratio, outputting a beauty score for the user using the Divine Proportion algorithm

EDUCATION

WATERLOO UNIVERSITY | HONOURS BACHELOR OF COMPUTER SCIENCE Co-OP

Sep 2018 - April 2023

UNIVERSITY OF NEW BRUNSWICK | SHAD FELLOW

July 2017 - August 2017
